Mr. Vargish indicated that there was an area of land adjacent to the subject tract that was previously rezoned from I-1 to B-4 to house a Subaru car dealership and that the dealership is now requesting approximately four additional acres of land to be rezoned in order to accommodate non-display vehicles for the dealership.

Subdivision/Land Development Plans

Mr. Gergely indicated that there would be no additional employees and that the building addition will be constructed over existing impervious area.
Mr. Gergely advised that there is also an area of impervious coverage on the property that will be returned to meadow in order to address the 20% stormwater requirement.
There were no further discussions.
Mr. Gibeault asked for public comment. There was no response.
On a motion by Mr. Swinehart, it was recommended to approve this plan and modifications contingent upon a clean review letter, seconded by Mr. Hendrix.

- ii. **Lancaster KIA** - Preliminary/Final Land Development Plan - 1046 Manheim Pike - Zoned I-2 and T-6 & T-1 Overlay Districts.
Present representing this Preliminary/Final Land Development Plan was Mr. Bill Swiernik, David Miller/Associates.
Mr. Swiernik indicated that this project consists of a new car dealership which will be located at the corner of Manheim Pike and N. Prince Street.
Mr. Swiernik advised that there was a text amendment approved last year that added Vehicle Sales and Service as a use by right in the current zoning district.

Mr. Swiernik indicated that there were several variances granted by the Zoning Hearing Board, one of which was for the build to line so that the building could be set back away from Manheim Pike. Mr. Swiernik advised that there was a condition on that setback approval which requires pedestrian lighting and landscaping along the sidewalk.

Mr. Swiernik stated that the site is currently covered with impervious surface and is bound by PennDOT owned land to the east of the subject property.

Mr. Swiernik indicated that there will be one full movement access and one emergency access off of Manheim Pike.

Mr. Swiernik advised that the distance from the full access drive to the Manheim Pike/N. Prince Street intersection is approximately 360 feet.

Mr. Swiernik stated that the perimeter of the site will be returned to green space to provide stormwater volume control.

Mr. Swiernik indicated that the roadway frontage improvements consist of curb and sidewalk which stops short of the intersection due to the PennDOT owned land.

Mr. Gibeault indicated that there would be a gap in the sidewalk from the intersection to the applicant's property and recommended that the applicant make that connection across the PennDOT property.

Mr. Gibeault asked for public comment. There was no response.

On a motion by Mr. Swinehart, it was recommended to table this plan and modifications until all outstanding comments can be adequately addressed, seconded by Mr. Lee.
